Detailed segmentation: 15 vertical markets, 7 size bands, 12 regions

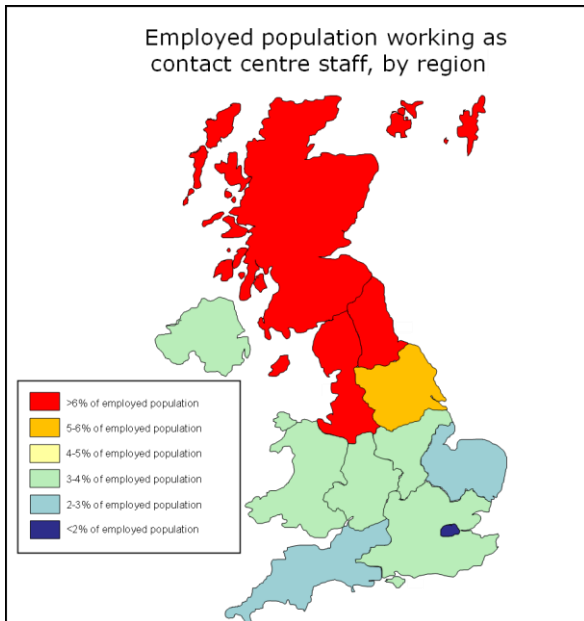

Forecasts until 2018 for agent positions, contact centres, jobs and technology penetration

NEW: Technology penetration rates: 15 technologies, by vertical and size band with forecasts

Key findings

There are 5,840 contact centres in the UK, with 734,000 agent positions.

After the UK contact centre industry's decline in 2009 - both in terms of contact centres and agent positions - 2011 - 2013 saw a continued gentle increase after 2010's tentative growth, with this year seeing more significant increase in headcount and the number of operations.

Large contact centres (with over 250 agent positions) employ around half of all contact centre staff, despite only accounting for less than 9% of physical contact centre sites.

The finance industry is the largest employer, with over 212,000 contact centre jobs in the sector.

3.98% of the UK's working population are employed in contact centres.

The retail & distribution sector has most contact centres (16%), although the finance sector has the most agent positions (17%). Outsourcing & telemarketing, services, public sector, IT, communications and utilities are also important sectors.

The mean average contact centre size is 126 agent positions, with outsourcers, utilities, communications, and finance contact centres having a larger-than-average mean size.

Outbound calling activity has declined considerably to 21.7%, from 33.7% in 2004, although more service-focused outbound calls are being made.

There were over 42 billion minutes of inbound calling in 2014.

16.4% of inbound interactions to contact centres are via email.

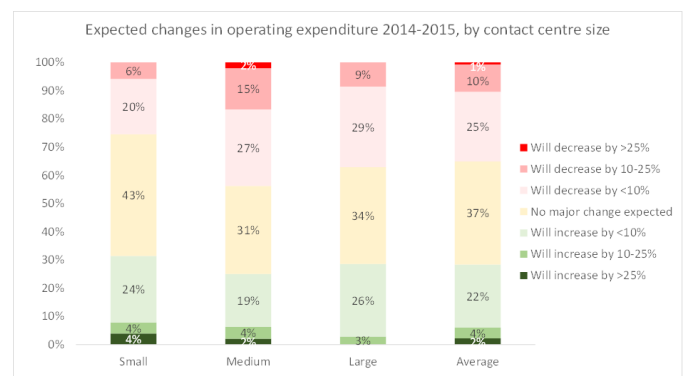

Web chat volumes will grow at a compound annual growth rate of 24% to 2018.

Mobile customer service app penetration will grow to 40% by 2018.

24% of businesses using a workforce management system are looking to replace it.

1 in 8 UK contact centres are looking to implement interaction analytics in the next 12 months.

Where used, 24% of call routing functionality is deployed in the cloud.

Medium-sized operations will be under the greatest pressure to reduce their ongoing costs in 2014-15, with 44% expecting to cut their operating expenditure.

Report contents:

- 95 charts and data tables show the size, structure and future of your market
- Based on ongoing primary research surveys with thousands of UK contact centres
- Unique historical data from 1995 onwards, with forecasts to 2018

Vertical markets covered for market sizing:

- Communications
- Engineering & Construction
- Finance
- Food & Drink
- IT
- Manufacturing
- Medical
- Motoring
- Outsourcing & Telemarketing
- Printing and Publishing
- Public Services
- Retail & Distribution
- Services
- Transport & Travel
- Utilities

Size bands:
